

Delegation Name: Morocco

Ambassador Name: Can Kerem Bircan

Honorable Chair, the most distinguished Delegates,

The delegation of Morocco is enchanted to be a part of the 29th annual TIMUN conference. In this conference, we first strive to achieve collective development and peace in our own country and with others.

Conflicts do exist, and will continue to exist. This is the very nature of our being here. To resolve disagreements as diplomatically and peacefully as possible. Nonetheless, we should not forget the significance of taking actions in order to identify and support structures for strengthening and consolidating peace in order to prevent the resumption of conflicts. Though, it may seem like the problem has been solved entirely, the outcomes especially to the civilian population could be devastating; sustainable peace can only be possible with a proper post-conflict action and precaution plan.

Throughout the conference, we will be highly sensitive to issues of all kinds such as illegal arms smuggling, which is one of the military and political issues that are closely related to our country in GA1, as well as environmental issues such as water poverty related to the population increase in the environmental committee.

Since its liberation from imperial and colonial activities, Morocco has remained stable politically and socially focusing on its own national development with a population of 37 million people 99% being Arab-Berber. Instead of seeing the movements made throughout the country as an irregularity and instability in the period called the Arab Spring, we made our country stronger and more holistic by establishing the constitutional monarchy. Especially considering the ongoing war in Europe, and in the post-pandemic

situation, we believe that countries need to unite with their people more than anything else during this hard period.

During the conference, we are delighted that there are different topics in the various committees that closely concern the world but especially the region we are in, namely Central Asia and the North of Africa. We have full belief that in this way, regional problems will be resolved and countries will have the opportunity to fulfill their responsibility towards their people more appropriately. Morocco has always aimed at peaceful stability with its king and people.

Thanking you once again, we wish to have a fruitful debate.
