

Delegation Name: SPAIN

Ambassador Name: Ece Zeynep DEĞİRMENÇİ

Distinguished Advisors, Honorable Chairs, and Esteemed Delegates ,

As the delegation of Spain, we would like to express how delighted we are to be a part of the 29th annual session of TIMUN onsite after a series of virtual conferences due to Covid-19 pandemic. We are here to debate on “Securing Post-Conflict Peace” from a variety of aspects during the conference. There are a considerable number of countries worldwide, the Middle-Eastern and North African countries in particular , as a part of conflicts with devastating repercussions for years. Still ongoing ones such as the Gaza Strip, Ukraine and Russia conflict, Yemen conflict, the Afghan War and territorial disputes between UAE and Iran had and have been reasons for not only regional but global humanitarian issues. To be specific, approximately half of the population of Afghanistan have migrated due to acute hunger, health and security problems, leading to border crises around the world. Almost for the same reasons around 4 million Yemenis have been displaced.

These conflicts and their long lasting repercussions are hard, but crucial to deal with. If peace is not ensured shortly, resource shortages, huge financial problems within the states, domestic disturbances due to the previously mentioned migrations and much more are yet to come. The UN has been working for decades to cease these issues and to help the regions to stabilize. Unfortunately, in the 21st century we still have to work to solve these problems. As the delegation of Spain we are eager to come up with permanent and peaceful solutions to the conflicts along with post crisis policies in terms of health, hunger, migration, thirst, security, finance and more. For the sake of peace, we strongly encourage all the states to collaborate and try to approach these global problems in a solution-oriented manner. Once again as the delegation of Spain we declare that we are and will be here to take on our responsibilities.
