

Delegation Name: Canada

Ambassador Name: Harry Seokjun Yoon

Honorable Student Officers, Delegates and the Executive Committee of TIMUN,

To start off, I am **extremely honored** to serve as the ambassador of the delegation of Canada. Additionally, our whole delegation is honored to be a part of this conference.

We believe in the need to discuss **our** future, as technological development continuously alters **our** world. Today, many powers try to dismantle it, separating nations from other nations and leading to **conflict**. We stand firmly towards the need for international peace and cooperation.

Furthermore, our delegation understands the significance of this year's theme, "The Uncertain Future of Traditional Industries: Labor in the Digital Economy". We believe that it is relevant in our world of **rapid change and development**. Our world is changing endlessly, every minute as AI and various autonomous systems are developed.

The delegation of Canada believes that we can make progress on the many issues brought forward, such as regulating autonomous weapons, addressing poverty and environmental issues, while inspecting political instability and the possible consequences of technology, **fostering** international peace, security and prosperity to all corners of our world. We look forward to meaningful discussions in all committees with our fellow member states.

We would like to conclude our speech by reaffirming the need for international cooperation to protect **our** globe.
