

Delegation Name: Russia

Ambassador Name: Defne Erkan

Dear delegates, student Officers, Advisors, and the Executive Committee,

It is a great honor for us to serve as the ambassador of the **Russian Federation** in **TIMUN'24**

Today, technology and digital tools are used in every **aspect of life** including armaments, national security, healthcare, and environmental subjects. We are aware that the wideness of these areas **comes with its challenges**, due to the lack of legal frameworks, diplomatic relations, and **supervision** under specific organizations to **maintain the human authority**.

As a nation with a strong focus on advancing technology, we present you our commitment to dedicating **vast amounts of effort** and resources to help forming a clear path to embracing artificial intelligence at its **fullest potential**.

We also take **great responsibility** by using our **diplomatic relations** and global **influence** to combat the issues that pose a risk to the sovereignty of states, the sustainability of the environment, global stability and so more which will also be debated in the upcoming days of the conference.

Lastly, we believe, with the solutions presented by other delegates, we will be able to find realistic and efficient solutions for maintaining **global peace and security** regarding this year's theme and wish everyone an enjoyable conference.
