

Delegation Name: Slovenia

Ambassador Name: İdil Karaca Durul

Dear delegates, Student Officers, Advisors and the Executive Committee of the Turkish International Model United Nations.

Firstly, It is an immense honor to stand before you today as we gather for this year's TIMUN.

The digital revolution is reshaping economies across the globe. Technologies like automation and AI are transforming industries such as manufacturing, agriculture, and services. While these changes present tremendous opportunities, they also bring challenges particularly for workers in sectors most vulnerable to automation.

In Slovenia, we recognize the need to embrace digital innovation while protecting our workforce. The key to this transition is education and upskilling. We must ensure that workers in traditional industries are equipped with the skills needed for new jobs in the digital age. Our commitment to digital literacy and vocational training aims to empower individuals to navigate an evolving job market.

Finally, collaboration is vital. Governments, businesses, unions, and educational institutions must work together to craft policies that foster innovation while protecting workers. We must ensure that the digital economy benefits all, upholding values of fairness and dignity

In conclusion, while the future of traditional industries may be uncertain, Slovenia believes that with the right policies and investment in people, we can ensure that the digital economy is a force for good—one that empowers workers, creates opportunities, and provides a better future for all.
